

DGT P69 FINISHER

The backside surface finish is really critical for molding machines.. Nickel is not an ideal conductor of a heat. It is important to have good contact between stamper and mirror face of the mold. For this reason uniformity between ID & OD becomes an important issue. DGT P69 provides uniform stress free stamper finishing that leads perfection in molding process.

- Easy to use
- Stress free stampers
- Uniform thickness between ID & OD

DGT P69 FINISHER

SPECIFICATIONS

Main Voltage: 230V 50Hz

110V 60Hz (On Demand)

Air Pressure: Max 8 bar

Min 6 bar

Physical Dimensions

Width: 723mm

Depth: 591mm

Height: 452mm
